

R-H2O · WATER & POWER

POWER AND WATER. FROM ONE SOURCE.

R624,999.00

excl. VAT

R718,748.85 incl. VAT

Six water-from-air units pull clean drinking water out of the air, all powered by the one trailer and its own Sunman panels. No borehole, no bowser, no water run.

 96 L A DAY, MAXIMUM	 80 L ON BOARD	 4.68 kW SUNMAN SOLAR	 10.2 kWh BATTERY
---	---	--	--

SPECIFICATION

Water units	6 × AW3 water-from-air units (Water from Air, South Africa)
Output	Up to 96 litres a day (16 L per unit), chilled to 5 °C
Purification	Pre- and post-carbon, TCR, reverse osmosis, three UV lamps, mineral cartridge
Storage	80-litre tank in the nose cone, 2 × Shurflo 7 L/min 12 V pumps
Solar and power	9 × 520 W Sunman panels (4.68 kW), 8 kVA inverter, 10.2 kWh LiFePO4. All six units run off the one trailer
Body	R-01 body built higher, 3CR12 stainless, 1.6 t axle
Access	Units on a rear slide rail, tool-free
Also available	A water unit added to your trailer build, on request

BEST FOR

-  Military operations
-  Disaster relief
-  Medical support
-  Agriculture & farming
-  Safari & conservation
-  Border & surveillance

WHY THIS ONE

Water resupply is the weak link in the field. The R-H2o removes it: one trailer's own panels power all six water-from-air units and store what they make.

Quote valid 90 days · 70% deposit starts the build · 4–6 weeks from deposit · Panels: 25-year linear production warranty · Prices excl. VAT unless marked. Prices and models subject to availability.
